I am a Mililani High School Freshman, in Honors History (Participation in Democracy) and I support Bill 10 because it is extremely beneficial to Hawaii. First off once we put Bill 10 into place in Honolulu, then the bill will be effective statewide, across Hawaii. This is a good thing because it helps decrease waste, and plastic bags are not biodegradable, so they stay around for a long time. They litter our environment and are hazardous to our native animals, and fragile ecosystem. This bill also helps support our Project Citizen plan, because no more plastic bags in Hawaii, it would save a lot of oil since there would be less materials to ship.
